Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/1/2010 has been entered.

Allowable Subject Matter

Claims 1-29 are allowed.

Reasons for Allowance

The following is a statement of reasons for indication of allowable subject matter. The prior art fails to teach or suggest the limitations of:

"product rules comprise a plurality of attributes, including mandatory and optional attributes, wherein said mandatory attributes specify (a) one or more entities to which said product rule pertains and (b) a scope of said product rule, wherein one of the optional attributes allows specifying one of said price tables," (as in Claim 1).

Such limitation is present in all independent claims.

It is old and well known in the art to utilize fee arrangements through which to price products.

Furthermore, it is also old and well known in the art to utilize data tables and programming rules to organize, store, search and retrieve information from a database system.

The instant application distinguishes from these old and well known practices by including mandatory and optional attributes, the mandatory attribute specifying the entity to which the product rule pertains and scope of the product rule, while optional attributes specify the price table to be utilized.

Disclosed Prior Art (applicant's specification) discloses a method/system for utilizing fee arrangements to price products. (see specification, p. 2, lines 1 - 21). Neither this piece of prior art, alone nor in combination with others, discloses nor suggests the feature of including mandatory and optional attributes, the mandatory attribute specifying the entity to which the product rule pertains and scope of the product rule, while optional attributes specify the price table to be utilized.

Parsaye (Parsaye, Kamran & Chignell, Mark. Expert Systems for Experts. John Wiley & Sons. 1988. pp. 35-60, 177-178, 191-210 and 295-309) discloses a method/system for organizing, storing, searching and retrieving information in a database system utilizing data tables (frames) and rules possessing a plurality of attributes (slots, values or attributes). (see pp. 35-60). Neither this non-patent literature, alone nor in combination with others, discloses nor suggests the feature of including mandatory and optional attributes, the mandatory attribute specifying the entity to which the product rule pertains and scope of the product rule, while optional attributes specify the price table to be utilized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

Art Unit: 3693

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
